

Wacky Science Wednesdays!

Stop by every Wednesday in March!

Science is part of everything children do each day. Children are poised for scientific discovery and we will be offering activities every Wednesday in March that provide children with the opportunity to make queries, explore properties, and make profound discoveries:

- ▶ Making color changing Wizard's Brew
- ▶ Trying multiple oobleck recipes
- ▶ Changing the color of flowers
- ▶ Testing what objects sink or float in quicksand

Join us every
Wednesday in
March for a day of
hands-on science
experiments!
